Classberry

Overview

A smarter way to run your school

Classberry is a powerful and intuitive browser-based school management platform that brings together administration, academics, communication, finance and other school operations in one connected environment

What is Classberry ?

A powerful and intuitive browser-based school management platform . Developed from years of experience in the education sector together with strong software-development expertise, Classberry is designed for schools in Zimbabwe and beyond.

As a web-based application, Classberry can be hosted within the school's own infrastructure or through Classberry Cloud for secure access from authorised devices and locations.
Classberry is simple, user-friendly and intuitive. It is designed around convenience, ease of access and the everyday processes of a school.

Customisable and Affordable

Classberry is not a one-size-fits-all system. The platform can be configured to suit the specific needs, structures and priorities of each institution.
Flexible licensing options are available, including annual rental and once-off perpetual licensing. Schools may select a ready-made Classberry package or build their own combination of modules.
Strategic partner institutions may also qualify for preferential licensing and support arrangements.

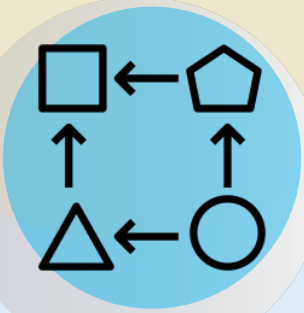

Support and Trainning

Classberry support continues beyond installation. We provide onboarding and training to help users understand the system and use it confidently within their daily responsibilities.
After implementation, clients have continued access to the Classberry support team for technical assistance, guidance and system-related queries. Support can also be provided as the institution grows, introduces new users or expands its Classberry configuration.

GREENFIELD EDUCATION THINK TANK

Excel in the endeavours of men, yet also in the knowledge of truth

KEY FEATURES

Customisable

Transform the system to suit your institution's business logic

Web-based application.

Access securely anytime, anywhere via your browser

User-Friendly

Simple, intuitive interface designed for easy learning and everyday use

Mobile App

Keep your School connected with the Classberry Mobile App for parents, learners and staff

Affordable

Flexible Annual Rental or once-off perpetual licensing. No recurring rental costs with perpetual licensing.

Reliable Support

Experienced Technical support available online whenever you need help

Classberry Modules

Admissions

Manage admissions, waiting lists, assessments, application fees. Track and log every step of the application process and create custom automated e-mails and WhatsApp messages to notify prospective parents of their application progress every step of the way. Application forms on the school website or the mobile app links with admissions module and with the students records at roll over for all accepted learners

Students Records

Keep detailed records of all your learners ranging from biography, marks, history, special needs, attendance, behavioral records, etc. Numerous customizable reports to pull a variety of information about your learner

Staff Records

Keep staff information organised in one place, including personal details, employment information, roles and relevant school assignments. The module supports accurate administration of the workforce and provides a dependable staff record that can be referenced across authorised Classberry functions.

Parents Records

Maintain parent and guardian information and link each record directly to the relevant learners. This makes it easier to navigate family relationships, maintain accurate contact details and support communication, billing, portal access and other school processes that depend on family information.

Curriculum Setup

Allow for an organized system of scheduling and teacher subject group allocations. Has features to execute detailed subject and assessment Designs.

Behavior Manager

Maintain merits and demer-its, offences, consequences and rewards with automated processes that allows for students to be rewarded or penalized for their actions. This module integrates with the Classberry App for notifications to parents

Classberry Modules

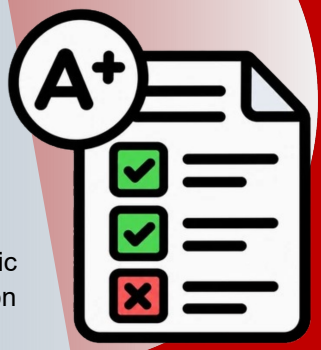

Assessments QL

Support qualitative and developmental assessment where learner progress cannot be represented adequately by marks alone. Schools can create descriptive assessment frameworks, capture observations and report progress in a structured way, making the module particularly useful for early childhood and developmental learning environments.

Assessments and Gradebook

Capture marks and manage assessment through an online gradebook linked to real learners, classes and subjects. Schools can structure assessment, maintain academic records and prepare information for report cards, transcripts, mark schedules and other reporting requirements.

Students daily attendance

Record learner attendance and registration against the school's established classes and timetable structures. The module helps staff maintain reliable daily attendance information, review patterns and make authorized attendance data available to other connected Classberry functions and reporting processes.

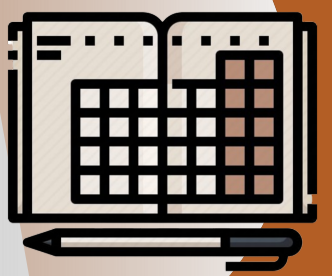

Calendar

Manage school events, meetings, activities and important dates in one shared calendar. Calendar information can support staff planning, family communication and event visibility across the Classberry ecosystem, helping the school keep its community informed from a consistent source. Integrates with the Classberry App for Automated notifications

Timetabler

Turn curriculum structures and teaching allocations into a practical school timetable. Build lessons from classes, subjects and teaching periods, assign teachers and organize lesson occurrences within one timetabling environment, giving the school a clear operational view of the academic week.

Mark Schedules and Results

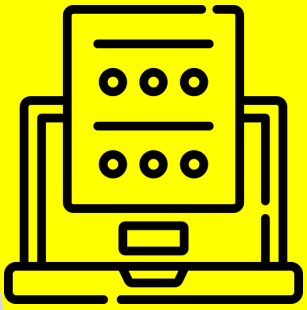

Transform captured assessment results into structured mark schedules, summaries and useful academic analysis. Schools can review performance at learner, class and subject level, support clearer academic reporting and use organised results information to guide academic monitoring and decision-making.

Classberry Modules

Classberry Test Generator

This module makes it easy for your teachers to create high quality, customized test papers for learners using Cambridge questions or any other selected source examination board past papers. Build a test by filtering questions by topic and by level of difficulty. Also generate marking schemes and download both paper and marking scheme in pdf format

Sports and Culture

Manage sports, clubs, cultural activities and other co-curricular programmes within the same learner environment. Track participation, organise activities and maintain a broader picture of student life, with relevant information available for reporting and other connected school processes.

Houses and Societies

Create and manage school houses, societies and other learner groupings. Allocate l earners, maintain membership information and support the organisation of competitions, activities and school culture, while keeping these structures connected to the same learner records used elsewhere in Classberry.

Library Module

Manage all your books and other categories of resources available in your library. With ISBN-Auto cataloguing and resource search feature. Comprehensive overdue system which integrates with the Classberry App and the communications module

Hostel Manager

Manage many aspects of your learners' hostel life. Manage each house, enrolment and exeat functionality. Create your own assessment checklist to manage and report on student behavior within the boarding environment. Module integrates with the gradebook module for reporting

Communications

Bulk communications with parents, staff, and alumni. Provides email, WhatsApp, Instant Classberry App notifications. Classberry App also provides instant messaging Detailed filtering allows for specific recipients selection. Manage and track all communications since the first day of use.

Classberry Modules

Family Portal

Give parents and guardians a secure window into the school information made available to them. The portal can support access to learner-related Information, communication, reports, notices and other approved services, strengthening family engagement without exposing internal administrative functions.

Alumni Platform

Maintain an organised relationship with former learners after they leave school. Alumni can keep relevant profile, qualification and career information current, helping the institution preserve its community, follow graduate journeys and build a useful record of long-term outcomes and success stories.

School Shop

Bring school retail services into the Classberry environment, including uniforms, stationery, books and related items, with scope for canteen and restaurant operations. The module helps schools manage these services as part of the wider institutional ecosystem rather than as disconnected activities.

Finance and Accounting

Support school finance through connected billing, payments, accounts, banking, collections, corrections, documents, reporting and audit functions. Financial activity can be linked to learners and payer responsibilities, helping schools manage fees and accounting within the same operational environment.

Classberry Communicator App

Extend supported Classberry services to mobile users and keep the school within easier reach of families, staff and other authorised users. The app provides a convenient access channel for selected information, communication and portal services connected to the institution's Classberry environment.
